Unveiling of the Blount Monument Impressive Ceremonies-Addresses of Governor Porter and Ex-Governor Neill S. Brown.

CLARKSVILLE, October 24.—The ceren CLARKSVILLE, October 24.—The ceremonies of unveiling the monument erected to the memory of Governor Willis C. Blount, at the beautiful Greenwood cemetery to-day, were attended by an immense crowd of people. Montgomery county and Clarksville honored themselves in doing honor to a man who belongs to all Tennessee.

The procession was a mile in length, and included the city schools, private schools, university students, benevolent orders and citizens. It was headed by Ex-Governor Neill S. Brown and Hon. Gustavus A. Henry, preceded by St. Joseph's band, of Nashville. Upon the arrival of the procession around the moment the ceremonies were opened by Bev. A. D. Sears addressing the Throne of Grace.

Hon. G. A. Henry, with a few remarks, introduced the speakers.

Hon. G. A. Henry, with a few remarks, introduced the speakers.

Governor Porter was the first to speak, giving a brief history of the Blount family. He dwelt especially on the services of Governor Willie Blount in having organized society and brought political and social order out of chaos. His service in directing the affairs of the State in peace, and organizing war against England and the Indians, were most graphically described in brief, but very thoroughly and satisfactorily. The governor's address deeply impressed the audience, which had thus been made ready to witness the ceremony of unveiling the monument, made out of Knoxville marble. The crowd gathering more closely about the monument, it was unveiled, impressive stience pervading the entire assemblage.

veiled, impressive sitence pervading the entire assemblage.

Ex-Governor Neili S. Brown then followed in an eloquent eulogium upon the illustrious dead and commentation upon the act of commemorating their deeds in peace and war. He spoke eloquently of the character of Governor Willie Blount and his great service in moulding the State and society, and made a noble appeal for sentiment and reverence for the illustrious dead, and for more manifestation of it. THE KEELEY MOTOR.

The Result of an Investigation of Its

Merits and Demerits.

Philadelphia Bulletin, October 18: As the

result of an investigation of the merits and demerits of the Keeley motor—an investiga-

ion extending over several years—the following statement of opinions can scarcely fail to be of interest to the public. It should

be premised that these opinions are not

possess—that probably does possess—scien ific value; practically, however, it is worth

ively engaged in furthering the enterprise. The social and business standing of the gen-

tlemen whom he has gathered about him, and who have contributed funds for carrying on the work, is such as absolutely to forbid the

assumption that anything but the purest honesty characterizes the undertaking. The practical disabilities which prevent the

motor from fulfilling its avowed purpose of moving machinery at an equal cost with steam—it should be remembered that a much

ess cost is claimed for it-are these: First-

still be largely in excess of the ordinar

steam-engine. Second—In manipulating each engine the services would be required, not

ing, and would be prepared to act in sudder and dangerous emergencies. Third—The re-sults obtained are altogether uncertain. Be-

attempt to start the engine into motion; every manipulation that he makes partakes of the nature of an experiment. The engine

may or may not respond to his attempt to start it. In short, it is beyond the power of his control; and all of his efforts to

bring it under his control—efforts constantly made during a number of years—bave been futile. Fourth—Even admitting that he may

overcome this difficulty, the results obtained

are so violent that the shock and jar upon the machinery tend rapidly to weaken it and

necessitate continual expense for repairs.

Fifth—It is impossible to produce the power in volume sufficiently great to run machinery with it uninterruptedly; actually, the time

amount of power will maintain the machinery in motion. A sixth disability, but of less importance than either of the others, is found in the fact that the power

going statements appear to sum up the situ-ation, and, if correct, demonstrate that

the Keeley motor never can accomplish any practical result. As we have said, they embody the views of gentlemen who

TO-MORROW (MONDAY)

To make our business a great success, and to build up an extensive establishment, we have started with the fixed purpose that we will positively sell goods as cheap as any house on the American Continent. We start with the metropolitan great and popular idea, that the smallest profits yield the largest sales. We start with the fixed purpose that, to build up a large trade, we must keep all classes of goods, for the rich and the poor—the cheap, the medium, and the fine quality. We have all these lines of goods, and

No House in America shall sell then Cheaper than this New, Great and Beautiful Establishment of
